INFRASTRUCTURE FOR THE ON-DEMAND ENTERPRISE

MetaFrame®

ACCESS SUITE

CITRIX®

The Citrix® MetaFrame® Access Suite is a system of integrated products that provides secure, easy and instant access to enterprise applications and information resources, and simplifies their management and deployment in heterogeneous computing environments. Citrix access infrastructure software, delivered through the MetaFrame Access Suite, is the easiest way for organizations to build an on-demand enterprise where information is accessible from anywhere, anytime, using any device, over any connection.

Why should an organization become an on-demand enterprise? With information the life-blood of any organization, all users—whether local, remote or mobile—need secure, easy and instant access to the exact applications and information resources required to do their jobs. However, until now, delivering on-demand information access has been complicated and expensive, due to the complexity of IT systems. To cope with these challenges, IT organizations are consolidating and simplifying systems and processes, moving toward an infrastructure that provides a consistent user experience and instant access to IT services, while reducing costs and strengthening security. In other words, more organizations are striving to become on-demand enterprises.

The foundation of an on-demand enterprise is access infrastructure, a category of enterprise software that provides: device and network services; information aggregation and personalization; security and identity management; application presentation and conferencing services; user provisioning and usage measurement; and service-level management.

The Citrix MetaFrame Access Suite is access infrastructure for the on-demand enterprise. This suite of products centralizes and safeguards access to applications and information,

and enables IT departments to deliver, manage, monitor and measure these resources on demand. By allowing organizations to run IT as a computing utility and provision software as a service, the Citrix MetaFrame Access Suite simplifies complexity and reduces the cost of administering and deploying heterogeneous information resources to users anywhere, at anytime, on any device or connection.

The MetaFrame Access Suite is an urgently needed solution to computing complexity and access challenges. For thousands of organizations worldwide, the MetaFrame Access Suite is helping increase IT efficiency and reduce costs. It's extending the life of existing hardware, software and networks by providing access using any device or connection—wired, wireless or Web. It's improving employee productivity, service delivery and decision-making with anytime, anywhere access to complete information resources. These organizations know that the Citrix solution is both complete and secure, and that it has earned the trust of its customers—now totaling over 120,000 around the world.

ABM INDUSTRIES

ABM Industries, Inc. provides a full set of backbone facilities services to businesses throughout the U.S. and Canada. With over \$2.1B in annual sales and more than 62,000 employees, ABM is the largest facility services contractor listed on the New York Stock Exchange.

"Our corporate ASP model has enabled us to centrally and cost-effectively deploy all applications and networking services to users around the country, even to those working in small offices."

"We have saved \$10 million over five years due to our MetaFrame Presentation Server solution. This figure is fairly conservative, and doesn't factor in 'soft' savings from increased employee productivity or reduced downtime. Soft savings may actually even exceed hard cost savings in the long run."

Anthony Lackey, CTO
ABM Industries

THE METAFRAME ACCESS SUITE BENEFITS ANY ORGANIZATIONS.

- Reduce costs of computing
- Protect enterprise information assets
- Improve customer service and employee work styles
- Improve productivity driven by ubiquitous access to business information
- Enhance business agility and increase ability to be opportunistic
- Ensure maximum resilience to business interruptions and dynamic adaptability to technology changes

THE METAFRAME ACCESS SUITE BENEFITS IT DEPARTMENTS.

- Control costs by reducing and increasing computing resources in parallel with business demands
- Reallocate IT expenses from running the business to growing the business
- Embrace application, network and device heterogeneity—for the first time—efficiently managing it from a single system
- Provide access to new applications and information systems "on-the-fly," greatly accelerating application deployment—often by an order of magnitude or more
- Manage the quality and costs of IT service levels through end-to-end oversight of where, how and when systems are being used
- Enable the CIO to run IT as a "corporate computing utility"

THE METAFRAME ACCESS SUITE BENEFITS ENTERPRISE WORKERS.

- Access to virtually any enterprise information resource from anywhere, at anytime, using any device, over any network connection
- A shield from the complexity of heterogeneous information systems, making the access experience effortless and uniform across devices
- A secure connection that knows your identity and dynamically adjusts to your device, your location and your preferences—even using non-trusted networks and devices.
- Freedom from the frustration of disconnection and downtime, and the headaches and time drain of personal application and password management

Citrix access infrastructure software delivers all these benefits and more. CIOs and their IT organizations use the Citrix MetaFrame Access Suite to build an on-demand enterprise that allows them to deploy applications much faster than ever, significantly reduce the costs of providing access to complex, heterogeneous IT environments, and increase business productivity, agility and decision-making.

Citrix MetaFrame Access Suite at a glance.

FRANK RUSSELL COMPANY

Frank Russell Company is a global leader in multi-manager investment services, managing more than \$76 billion in assets in a variety of multi-manager funds and advising clients worldwide representing more than \$1.6 trillion.

The firm uses Citrix to provide staff with access to more than 250 applications. With Citrix, Frank Russell saves an estimated \$90,000 when opening each new field office.

"Over the next five years, Russell likely will realize more than \$5 million in savings from implementing Citrix software and an additional \$4 million in future cost avoidance from outsourcing IT operations."

Tom Hanly, CFO
Frank Russell Company

CITRIX ACCESS INFRASTRUCTURE

Citrix access infrastructure software helps organizations provide easy, secure, and instant access to enterprise information and applications, while controlling IT costs and complexity. The Citrix MetaFrame Access Suite solves critical information access challenges, including connecting remote offices, providing mobile access to information, accelerating enterprise-wide application deployment, and enabling continued operations during an interruption. Citrix customers are leveraging the MetaFrame Access Suite to address regulatory compliance issues by centralizing applications and data and providing secure, authorized access on demand. Citrix software delivers measurable ROI and benefits including cost savings, higher productivity, improved decision-making and greater business agility.

CITRIX METAFRAME ACCESS SUITE

The Citrix MetaFrame Access Suite offers organizations the easiest and most cost-effective way to provide a single, secure point of access to enterprise applications and information on-demand. The Suite ensures a consistent user experience anywhere, on any device or connection, while allowing IT staffs to centrally deliver, manage, monitor and control enterprise resources. Products in the Suite are fully integrated, making it easy to add and extend the value of your MetaFrame implementation.

Citrix MetaFrame Presentation Server for Windows®

The foundation of the Citrix MetaFrame Access Suite, Citrix MetaFrame Presentation Server for Windows is the world's most widely deployed presentation server for centrally managing heterogeneous applications and delivering their functionality as a service to workers, wherever they may be.

Citrix MetaFrame Presentation Server for UNIX®

Provides users with secure access to UNIX and Java™ applications, supporting Sun Solaris™, HP-UX® and IBM AIX® platforms.

Citrix MetaFrame Secure Access Manager

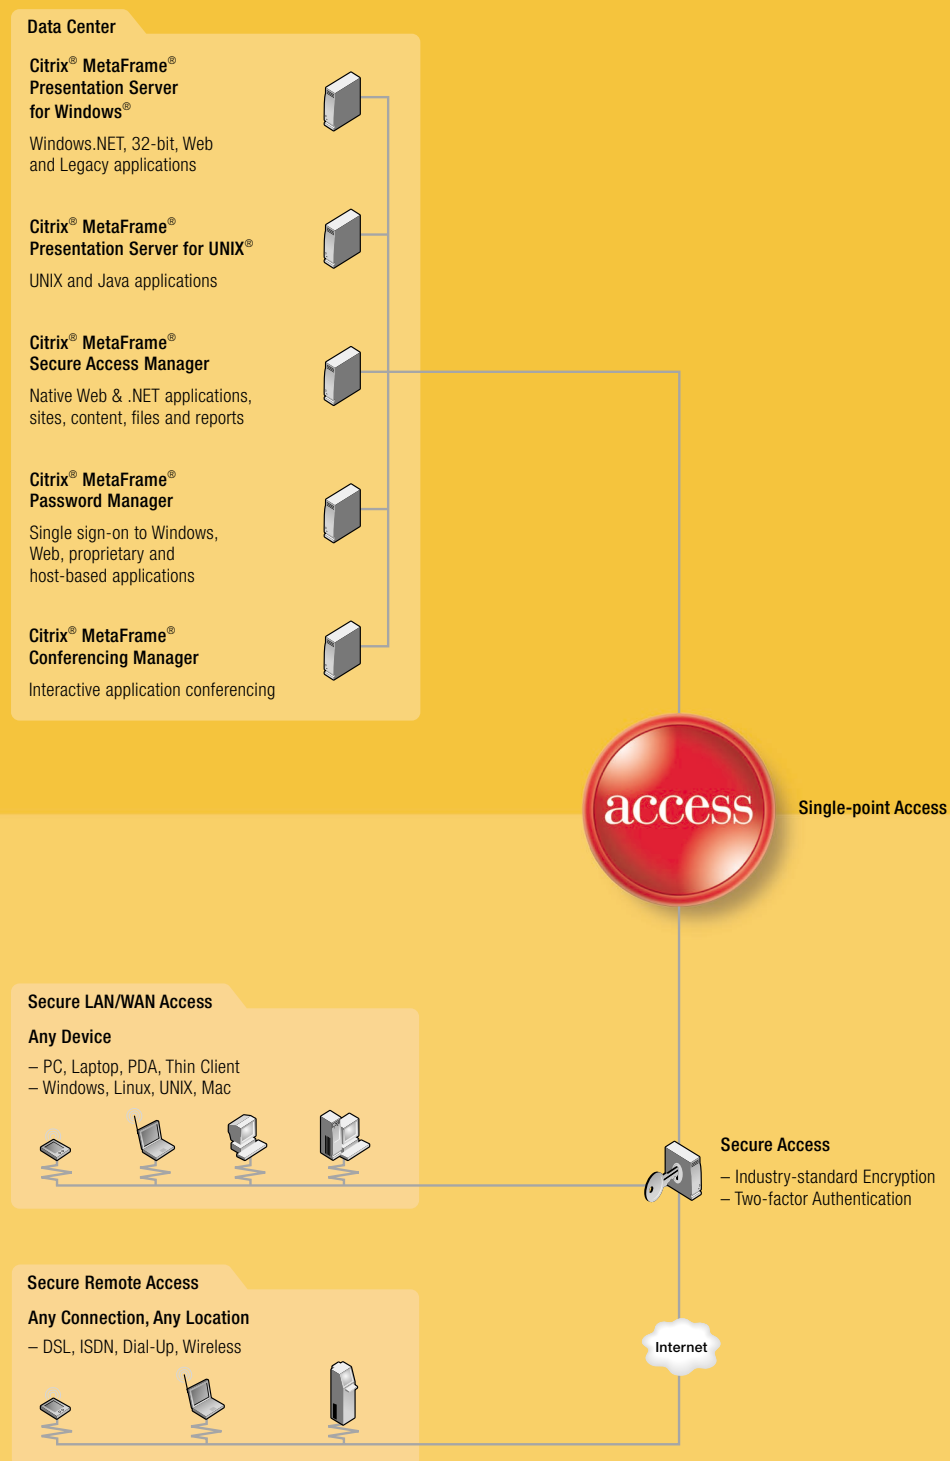

Provides secure, single-point access over the Web to a wide range of internal and external information resources, including applications, data sources, documents, Web content and services. With a powerful set of easy-to-use, wizard-driven configuration tools, IT administrators can enable browser-based access to the entire enterprise.

Citrix MetaFrame Password Manager

Provides universal password security and single sign-on access to Windows, Web, proprietary and host-based applications running within the MetaFrame environment. Users authenticate once with a single password, and MetaFrame Password Manager does the rest, automatically logging into any password-protected information systems, enforcing password policies, monitoring all password-related events, and even automating end-user tasks.

Citrix MetaFrame Conferencing Manager

Adds intuitive application conferencing to MetaFrame Presentation Server that eliminates the geographical distance between team members, increases the productivity of meetings, and allows easy collaboration.

The Citrix® MetaFrame® Access Suite is a system of integrated products that provides secure, easy and instant access to enterprise applications and information resources, and simplifies their management and deployment in heterogeneous computing environments.

TRUSTED.

Citrix is the most trusted name in enterprise access.

Nearly 50 million workers in more than 120,000 organizations around the world use Citrix access infrastructure solutions. And these customers include the vast majority of the world's most successful companies—100% of the *Fortune* 100, 99% of the *Fortune* 500, 97% of the *Fortune* Global 100, and 92% of the *Fortune* Global 500. Winning customers is the first measure of trust. Keeping customers is the second—and far more important—measure. Citrix has a 92% customer loyalty rating overall, significantly higher than the industry average.

COMPLETE.

Citrix has the most comprehensive solution for accessing any enterprise resource.

The Citrix MetaFrame Access Suite is the most complete solution for enabling the on-demand enterprise. The MetaFrame Access Suite enables IT teams to support a wide range of access requirements for displaying, organizing, protecting, delivering and managing information

access—cost-effectively. It enables central deployment and management of the widest range of IT services; it works across a wide range of networks; and it supports any type of access device.

SECURE.

Citrix uniquely combines ubiquitous access with highly robust, end-to-end secure access.

Citrix access infrastructure protects and guards corporate information assets while making them widely accessible. This approach starts with centralization of application infrastructure and access control. Citrix access infrastructure transmits “information pictures” over the network rather than sending real corporate data over potentially non-secure connections, and encrypts the transmission, allowing secure use of the public Internet. Finally, Citrix effectively manages the authentication process.

About Citrix: Citrix Systems, Inc. (Nasdaq:CTXS) is the global leader in access infrastructure solutions and the most trusted name in enterprise access. Citrix software enables people in businesses, government agencies, and educational institutions to securely, easily and instantly access the on-demand enterprise, from anywhere, anytime, using any device, over any connection. Nearly 50 million people in more than 120,000 organizations rely on the Citrix MetaFrame Access Suite to do their jobs. Citrix customers include 100% of the *Fortune* 100 companies, 99% of the *Fortune* 500, and 92% of the *Fortune* Global 500. Based in Fort Lauderdale, Florida, Citrix has offices in 26 countries, and more than 7,000 channel and alliance partners in more than 100 countries. For more information visit www.citrix.com.
